

MUHAMMAD HASEEB

AI Engineer | Python • LLMs • RAG • AI Agents

+92 325 2551585 • mhaseeb018@outlook.com • linkedin.com/in/m-haseeb-afzal • github.com/haseeb-glitch • Karachi, Pakistan

SUMMARY

Recent Software Engineering graduate (Bahria University, June 2026, CGPA: 3.52/4.0) with hands-on, production-level experience in LLMs, RAG pipelines, AI agents, prompt engineering, and OpenAI/Groq API integrations. Built and shipped real AI systems — including an AI sales agent used daily by a live client — during a full-time AI Engineer internship, freelance work across 7 countries, and an official Final Year Project. Ready to contribute immediately.

TECHNICAL SKILLS

Python & AI: Python (primary) • LLMs • RAG Pipelines • AI Agents (CrewAI) • Prompt Engineering • OpenAI APIs • Groq • AssemblyAI
ML & NLP: Machine Learning • Deep Learning (PyTorch) • NLP • Computer Vision (YOLOv8, OpenCV) • Scikit-Learn • Pandas • NumPy
Backend & APIs: Flask • FastAPI • Node.js • REST APIs • n8n • Webhooks • JavaScript
Data & Databases: PostgreSQL • MongoDB • SQL Server • Vector Databases (RAG)
Tools: Git • GitHub • Docker • Jupyter Notebook

EXPERIENCE

- AI Engineer Intern – SkillTech Sol

Nov 2025 – Apr 2026 | Karachi, Pakistan (Full-time)

 - Built and maintained backend automation pipelines for three production AI products (PalmNews, Smart Solar Advisor, Trading & Grading Solutions), integrating REST APIs for data ingestion, preprocessing, model execution, and automated report generation.
 - Developed ML models for Smart Solar Advisor achieving $R^2 = 0.978$ and a feasibility classifier at 99.8% accuracy; implemented PCA and K-Means customer segmentation (silhouette score 0.56).
 - Built the NLP-powered ingestion pipeline for PalmNews, aggregating and personalizing content from 30+ global sources, and contributed to a trading analytics platform with MT5 and exchange API integration.
- Freelance AI/ML Engineer & Automation Developer

Jan 2025 – Present | Remote / Karachi, Pakistan

 - Delivered 20+ AI/ML and automation projects for clients across the USA, UK, New Zealand, India, Egypt, Brazil, and Indonesia.
 - Built Pablo, an AI sales agent for a Harley-Davidson dealership, cutting lead response time from hours to under 3 minutes and increasing lead engagement by 300%+ (full case study under Projects).
 - Built a multilingual real-time news aggregation platform translating and clustering stories from 20+ countries.
- Data Visualization Internship – Excelerate x SLU

Dec 2024 – Jan 2025 | Karachi, Pakistan

 - Led a 5-person multicultural team building 2 dashboards in Looker Studio across 2 datasets (200K and 40K rows); awarded Star Performer and a \$1,000 scholarship for leadership, dashboard quality, and insight delivery.

PROJECTS

- Pablo – AI Sales Agent for Harley-Davidson Dealership (Client Project)

 - Built a full AI-powered BDC (Business Development Center) platform (Node.js, Express, Supabase/PostgreSQL, Groq API/LLaMA 3.3, Twilio, React) automating lead response, scoring, and follow-up end to end.
 - Designed a 0-99 buying-probability engine and automated 7-day plus long-term nurture sequences, cutting response time to under 3 minutes and lifting lead engagement 300%+.
 - Built a real-time dashboard with lead scoring, automated appointment detection, and manual takeover controls for the sales team.
- IntelliHire – Multi-Agent AI Interview Evaluation Platform (Official FYP, 3-member team)

 - Co-built a multi-agent AI platform (CrewAI orchestration, Flask, AssemblyAI, Groq) evaluating candidates across text, audio, and video using specialized HR, Technical, Stress, and Company Research agents with a central scoring coordinator.
 - Built a RAG-based personalization pipeline retrieving context from uploaded resumes and job descriptions to generate tailored interview questions, with answers evaluated by the agent system for a final score.
 - Owned the video evaluation module (computer vision-based stress and engagement signal extraction) and the Technical and Stress agents, implementing rubric-based scoring across conceptual understanding, problem-solving, emotional regulation, and response stability.
- NexGen Football – AI-Powered Match Analysis System (Team Lead, 3-member team)

 - Led a 3-member team to build a real-time computer vision pipeline (YOLOv8, PyTorch, OpenCV, K-Means, Optical Flow) that detects and tracks players from match footage to generate coaching insights including speed, distance, and team classification.

EDUCATION

Bahria University | Bachelor of Software Engineering | CGPA: 3.52/4.0 | Karachi, Pakistan | 09/2022 – 06/2026

ADDITIONAL INFORMATION

Certifications: DataQuest II (Advanced ML, Data Engineering & BI)
Languages: English (Native), Urdu
Awards: Star Performer, Excelerate x SLU Internship (Awarded \$1,000 scholarship for dashboard excellence)
